

We claim:

1. Compounds comprising the chemical structure

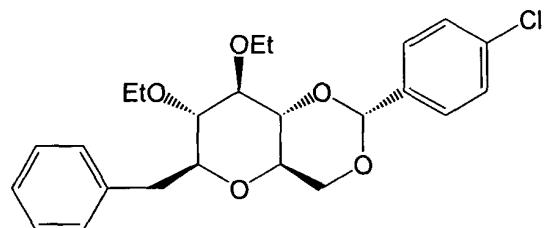

wherein X₁, X₂, and X₃ are selected from the group consisting of O, N, and S;
wherein Y₁ and Y₂ are selected from the group consisting of O, N, and S; and
wherein Z is selected from the group consisting of F, Cl, and Br.

2. Pharmaceutically acceptable salts of the compounds of Claim 1.

3. Compounds having substantially identical spatial occupation, physiochemical and electrochemical properties as the compounds of Claim 1.

4. A compound comprising the chemical structure

or a pharmaceutically acceptable salt thereof.

5. A pharmaceutical composition comprising compound of claim 1 and a pharmaceutically acceptable carrier.

6. A compound having the three-dimensional structure characterized by the atomic structure coordinates of Table 5, said compound having less than a 10% difference in the internal coordinates after minimalization with the MM2 force field.
